## **Thin Blue Online makes debut at CPCA Trade Show**

### *Online Training for Cops, by Cops*

**LONG BEACH, CA, MARCH 20** The California Police Chiefs Association (CPCA) marked the event Thin Blue Online made their debut. Thin Blue Online provides proven eLearning programs for law enforcement to practice and improve verbal communication skills. Structured practice is critical to success but unlike simulations for building proficiency with a sidearm, there has never been a tool for law enforcement officers to build proficiency with their voice, until now!

ThinBlueOnLine.com provides a structured practice platform that builds verbal proficiency skills. The patented elearning approach allows officers to learn faster and retain longer through engaging self-study practice sessions. With 24/7 availability on computers, tablets and other mobile devices, results can be delivered directly to superiors with real time reporting available.

One Thin Blue Online representative said “this training is developed for Cops, by Cops. Communication is the key to de-escalating a potentially life-threatening situation.”

Thin Blue Online is currently looking for law enforcement departments that would like to become Beta Test partners. Participation would allow Thin Blue Online to provide simulations that target the needs of a particular department. Contact [info@ThinBlueOnLine.com](mailto:info@ThinBlueOnLine.com) to learn how you can benefit from this training today!

*Thin Blue Online is an eLearning program to practice and improve verbal communication skills.*
